

ADVANTAGE AI

<https://advantage-ai.co.uk>

The Challenge

AI is capable of delivering significant commercial benefits, but also demands rigorous governance and risk management. Losing customer trust due to AI bias or discrimination can be catastrophic. Failing to demonstrate fair outcomes, regulatory compliance and meaningful human oversight can lead to enforcement action and material financial penalties. To achieve operational resilience and regulatory defensibility, senior leaders need clear visibility of their AI risk exposure and the practical tools to manage it.

OPERATIONALISING AI RESILIENCE

AI Anxiety to
AI Assurance

Using AI can be easy. Safely implementing AI in the workplace can be complex and regulator penalties can be significant.

Our Solution

ADVANTAGE AI provide peace of mind to executives and senior leaders with the essential solutions tailored to high-stakes, regulated UK financial services organisations.

1. Independent AI Risk Assessments

Independent assessments of current management, technical and operational capabilities that offer clarity on an organisation's current AI risks with a prioritised roadmap of remediation actions to deliver robust board-level assurance.

2. The Executive AI Masterclass

An online, self-paced masterclass for board executives and senior leaders (SMFs) needing to rapidly close the AI governance gap. Delivered in bite-sized content to fit busy schedules, the program transforms strategic risk into a competitive advantage

3. Interim Leadership

Flexible bespoke assignments to augment current leadership teams fractional and short-term engagements.

We don't sell AI systems. We deliver regulatory assurance. *Independently.*

Take control of your AI risk exposure before the regulator does. Contact us today...
